

24 February 2006

I am the Senior Construction Manager for US Home Sarasota. Currently we are building the Villas of Sable Trace project located on Appomattox Drive, in North Port Florida. There are 166 Villas in this community. To date there are 76 Villas constructed, all using the E-Wall product. From a construction stand point, I find the E-wall building process to be fast, clean, and safe. The trades that follow find the E-Wall product to be faster and easier to work with than the more traditional building materials.

I have enjoyed working with the staff at Efficient Wall Systems. They are professional, punctual, and very attentive to all US Home requirements. We are on schedule and delivering a superior home.

I am looking forward to working with Efficient Wall Systems building additional communities for US Home Sarasota.

Thank You,

John Stanley
US Home Sarasota
Senior Construction Manager
