*Now that you've seen the possibilities,
go with the flow—and the floor—that brings
out your natural creativity.*

marmoleum®

seriously fun floors...naturally

Many happy feet per room.

Kick off those shoes, baby!

Made from natural ingredients—linseed oil from flax, wood flour, rosins, limestone, pigments and jute—Marmoleum® flooring from Forbo is good-natured fun.

What is Marmoleum?

It's not carpeting—it's beautiful, durable, clean and allergen-free. And it's not plastic; vinyl has gone the way of, well, vinyl. What Marmoleum is, is perfect for unique floors. Got a design for the bedroom? Marmoleum. For the rec room? Marmoleum. The kids' room? Marmoleum. The kitchen? The living room? The bath? You get the idea.

SERIOUS about the environment.

It all starts with nature: Linseed oil pressed from flax. Wood flour from timber grown in controlled forests where every tree felled is replaced. Pine rosins mixed with the linseed oil for a flexible texture. Jute fibers woven as the backing. All came from the earth, and to dust they shall all return. Marmoleum is biodegradable.

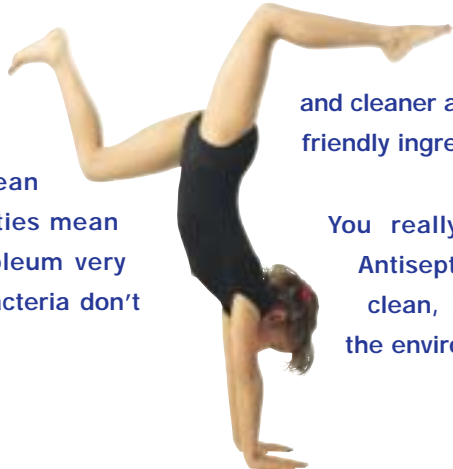

Even the adhesives used to install Marmoleum are environmentally friendly, totally free of solvents, and meet all low VOC (volatile organic compound) requirements. You won't find harmful substances in our floors: no lead, no formaldehyde, no chlorine. Nada.

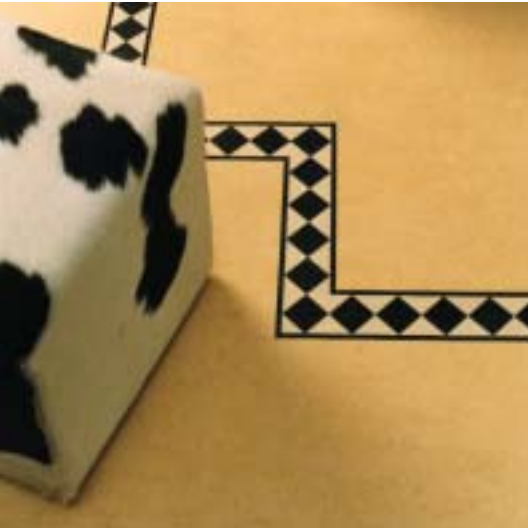

Marmoleum is the product of clean living. Natural anti-static properties mean that dirt doesn't stick to Marmoleum very well. And since dust mites and bacteria don't like us, you'll love us.

Once Marmoleum Floor Finish is applied, sweeping, dust mopping, and vacuuming generally take care of loose dirt and dust. For tougher stains, Marmoleum Concentrated Floor Cleaner can be used as needed. And when that's done, feel free to pour it down the sink in good conscience: Both our finish and cleaner are made from environmentally friendly ingredients too.

You really *could* eat off this floor. Antiseptic, allergen-free and easy to clean, Marmoleum is serious about the environment.

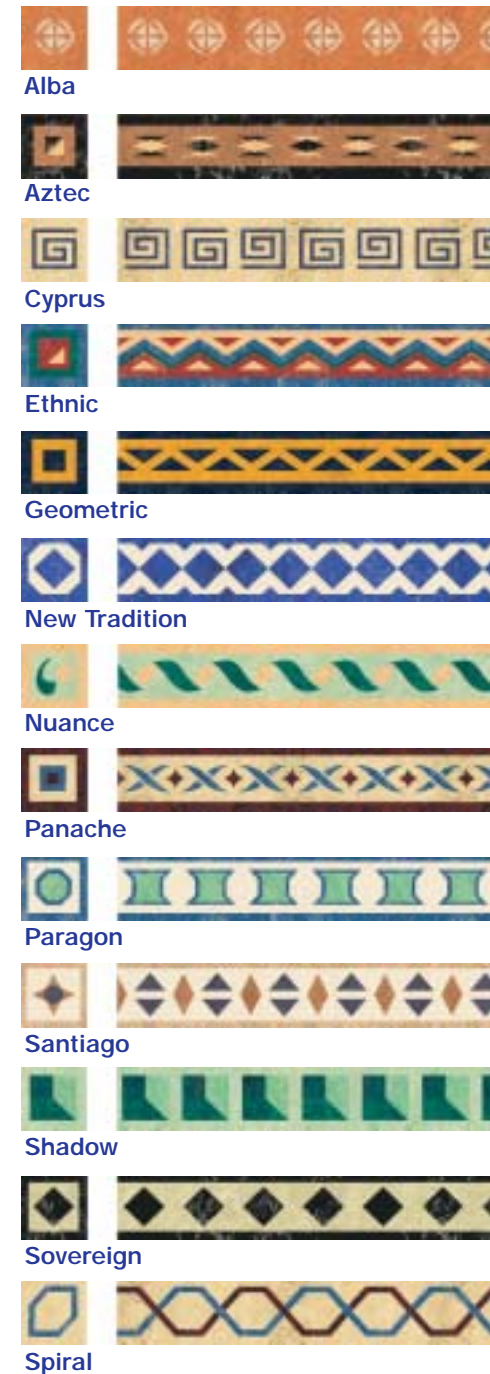

FUN in *your* environment.

Why should all the art be on the walls? With **more than 100 colors**, you can design the floor for any space, and make it *yours*.

With 13 standard configurations, you can select your style and any of the 100+ colors in Marmoleum's Design-It-Yourself Borders & Corners. These elements can add unique custom features to your floor design. Who said borders meant limits?

Or you can walk on the "wow" side, and let your imagination be your only limitation!

"Square feet?" Not with this floor, baby. Marmoleum is great looking, comfortable and warm to the touch. And no matter how "loud" your personal design, Marmoleum is quiet beneath your feet. You won't want to cover *this* floor with rugs.

Borders are 4 3/8" x 39 3/8"; corners are 4 3/8" x 4 3/8"; not shown to scale.

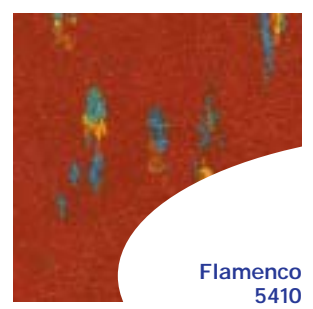

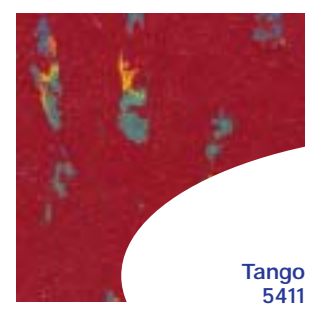

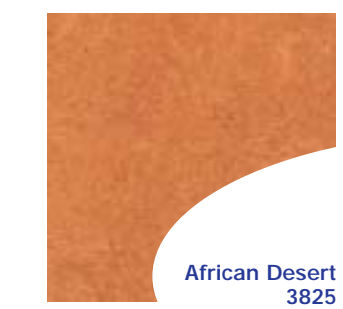

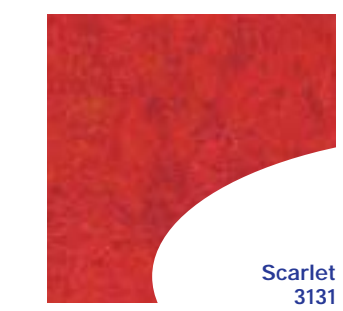

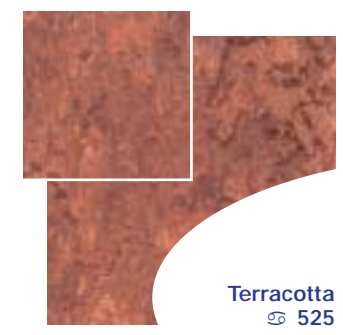

Ask for Marmoleum's "Go Your Own Way" customization brochure for more design ideas on creating your "special space."

SUNSETS boulevard

So much *better* than just the red carpet treatment.

Forget carpet. Marmoleum is a floor of a different color. More than 100 colors, in fact. And with so many hues to choose from, Marmoleum is only waiting on you to create a work of art.

custom HOT RODS

Whether you just want to cover your tracks, or take the road less traveled, Marmoleum's welding rod strips can help customize your floor design. Use them to create a seamless floor by welding the seams together with a matching color rod where pieces of Marmoleum meet. Or integrate the welding rods as their own design elements in contrasting colors, even when you don't need to fill in seams.

Got a design? Marmoleum welding rods will help you floor it!

2939 Black Marmoleum with contrasting R3128 welding rod

* MC indicates a multi-color weld. R indicates a solid color weld.
