

MARMOLEUM® *click*

Fun to design. Easy to install.

Marmoleum click is an ecologically produced, natural linoleum on HDF with a cork layer, that comes in 91 x 30 cm panels or 30 x 30 cm squares.

Its unique construction with the patented click system, combined with a broad colour palette, give you a naturally cosy flooring with maximum design freedom.

Feel free with Marmoleum click

A natural, stylish floor that is easy installed and maintained. Flooring that also gives you the freedom to design your own patterns – with a system that lets you create your own atmosphere. **Enjoy the feeling of having it your own way. That's Marmoleum click.**

Marmoleum click is a high-quality product and the ideal flooring for most rooms in the house, from the hallway, kitchen and children's rooms, where traffic is likely to be heaviest, to the living room, study or bedroom. The only places it's not suitable for are 'wet' rooms like the bathroom or sauna.

As you like it

Give your house a distinctive personality. Create exactly the ambience you want, simply by choosing your own flooring pattern in the colours you like. Marmoleum click offers you the freedom to create a unique floor to suit the mood of each space. Your choice can influence the feeling of light and space, the atmosphere and mood you want to enhance. Marmoleum is all about expressing yourself, allowing your home to reflect your individuality.

A hundred and one options

Combinations of colours and patterns decide the effect. Use quiet shades for a neutral, functional background or experiment with daring splashes of colour. Brighten up your home with cheerful hues or use clear, refreshing colours for a soothing atmosphere. Use light tones to make your room look bigger or make awkward spaces cosy with a selection of warm colours.

A smooth Marmoleum floor in your single favourite colour is always beautiful. But since the flexible mix-and-match system lets you juggle colours easily, why not be creative with different shades or patterns possible with Marmoleum click, squares and other accessories?

Marmoleum is a natural product, so all the colours have been inspired by the richness of nature. Deep Verdi Green, soft yellow Caribbean and warm African Sand, for example. Of course, Marmoleum click also looks well in combination with other materials, like stone or wood.

Once you have decided on colour and atmosphere, you can unleash your creativity to design your own floor. Don't forget to make a sketch based on the actual size of your room, and remember to take the width of the material into account, too.

Easy to install

Your Marmoleum click floor is easily installed. The flooring slots together with a simple 'In & Out' system that allows you to simply 'click' the panels into place. Marmoleum click panels are nice and wide, so a good smooth floor is quickly finished. And no glue is required, so the floor can be walked on immediately after installation.

To complete your floor, a series of skirting finishes and profiles are available. Marmoleum is extremely durable and suitable for use in most rooms of the house. And should your floor get damaged, you can easily replace individual panels, so it will look as good as new again.

Marmoleum click can be installed on almost every type of floor. Only if the floor or underlay is very uneven (differences of 2 mm or more) you will need to even it out before installing your Marmoleum click. Of course, you can also choose to have the floor installed by your Marmoleum click retailer.

Back to Nature

Marmoleum click has a top layer of linoleum made from predominantly harvestable, natural raw materials, ecologically produced. The main ingredient is natural linseed oil, which is mixed with rosin, limestone, and pigments. Compressed onto a jute fabric under high pressure, the result is an extremely durable and natural flooring.

'Drying room yellowing'

Don't be surprised if the colour looks different at home, when Marmoleum click is first delivered. It may have a yellowish film that wasn't visible in the shop when you selected it. This is due to the drying room film: a layer of oxidised linseed oil, which forms on the Marmoleum in the final phase of the production process.

Naturally. It's Marmoleum.

Don't worry – it will quickly disappear (usually within 24 hours) as soon as your floor is exposed to (day)light.

Please note, since linoleum is made from natural raw materials, slight colour and structural differences are possible between production batches, samples and the delivered goods.

Practical & Durable

Easy cleaning

Marmoleum is durable and colour-fast. Keep it dirt-free with a dry dust wiper and remove spots with a neutral cleaner and damp cloth. For best results, use Marmoleum floor-care products: Marmoleum cleaner and Marmoleum polish.

Health & hygiene

Marmoleum click makes life easier for people with asthmatic allergies and other respiratory disorders. It is easy to keep dust-free. And lab tests show that Marmoleum is also anti-static and bacteriostatic, so micro-organisms don't stand a chance. Use Marmoleum click for a healthy, hygienic home.

Warmth & peace

Because Marmoleum is a natural product like wood, it makes your house snug and warm. It reaches room temperature quickly and can even be used with under-floor heating*.

* Do note, however, that the flooring construction will limit heat transfer.

Same place, different face

It is largely your choice of colours and pattern that determines the atmosphere you create. Warm orange and brown hues will make your house cosy and warm, while bluish and green tones will give you fresh and clear space. To make the very best of all the possibilities offered by Marmoleum click, we recommend that you bear the following practical tips in mind. But when all's said and done, there are no rules when it comes to personal preferences!

53174 sahara, 63825 african desert, 53858 barbados

In cooperation with Dintra Interieur (sofa by Living Divani), Claudie Jongstra (natural coloured pillows).

Room size and shape

A dark colour or busy pattern may not suit a small or long, narrow room, because this can make the room look even smaller. However, stripes or diagonal patterns can create optical effects that completely transform a room.

Function

A living room or bedroom often lends itself to darker, warmer colours, whereas a clean, crisp environment may be more appropriate for a kitchen.

Furniture

The more furniture there is in a room, the smaller the floor area that is visible, so a simpler pattern is often the best choice. However, amazing effects can be achieved by a well chosen pattern.

At your service

To ensure straightforward installation, a perfect finish and a floor that is easy to clean, Forbo Flooring offers the following service articles.

Installation aids

Wedges

Fitting Wedges

Tension iron

Skirting finishes

To cover the all-round expansion joints, Marmoleum click skirting boards can be fitted. Skirting boards in 22/50 mm are available in 4 different colours (beach, maple, oak and ash grey) and contain a Marmoleum inlay strip in any of the colours from this collection.

The skirting is installed with a concealed clip fitting, and enables invisible cable installation.

Jointing profile

An expansion joint has to be provided if the surface to be covered is longer or wider than 8 meters. This is covered with a jointing profile. The same applies in the area of doors, connecting passage-ways and polygonal-shaped rooms. In general, adjacent rooms must be separated by a jointing profile.

Transition profile

Use the transition profile to adjust to adjacent, lower lying areas or floor coverings.

End profile

The end profile is ideal for clean finishes of the flooring in front of higher, adjacent sills, tiles or other raised floors.

Cleaning and maintenance

Marmoleum floor care - specially designed for Marmoleum - will keep your floor in perfect condition for many years:

- **Marmoleum cleaner** for effective and simple cleaning.
- **Marmoleum polish** to maintain and restore the protective finish.

MARMOLEUM® *click*

Marmoleum click is available in panels of 91 x 30 cm. They are approx. 9.8 mm thick and are supplied in boxes of about 1.91 square metres (7 panels).

Suitable for warm water underfloor heating. Heat resistance (incl. PE-foil) in accordance with DIN 52612: 0,08 m² ·K/W (req.: < 0,15 m² ·K/W).

Dimensional stability in accordance to EN 13 329 max. 0,6 mm.

Indoor air quality: certified with TÜV ToxProof-Label

Formaldehyd class EN 717-1:
E 1 (0,1 ppm)

Disposal: energy recovery/ oddments can dispose at domestic refuse

Determination of the effect of simulated movement of a furniture leg in accordance with EN 424: no visual damage

EN 685

Application areas Marmoleum click/click square according to EN 685.

class 23 (e.g. living rooms/bedrooms/entrance halls)

class 32 (e.g. hotels/boutiques/conference rooms/small offices)

Marmoleum is provided with an ETC-finish. We advice to treat your floor with Marmoleum floor care immediately after installation.

We recommend cleaning Marmoleum 'dry'. Dust wiping is the most effective and efficient method of removing loose dirt. If there are stains, spot-treatment is sufficient.

Marmoleum has bacteriostatic properties, which are confirmed by famous laboratories such as TNO (The Netherlands) and NAMSA (USA), even against the bacteria MRSA.

Not suitable for wet areas, such as bathrooms, saunas, etc.

MARMOLEUM® *click*

Looking for a new floor?

The natural choice is Marmoleum click. Because Marmoleum is:

- ~ ecologically produced from natural raw materials
- ~ extremely hygienic (easy to clean and bacteriostatic)
- ~ very comfortable (sound reduction)
- ~ creative; make your own designs by combining various colours and decorative elements
- ~ easy to install with the In & Out system and removable panels
- ~ practical and very durable (suitable for chair castors, stain resistant, fade resistant, antistatic, suitable for installation on warmwater underfloor heating)
