

# SPIN X

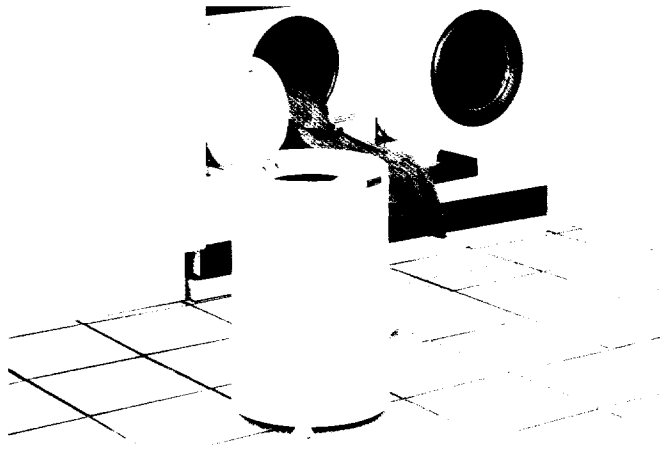

## Saving you backaches, time and money.

The SPACEAGE spindryers from SPIN-X. Clothes removed from your washing machine, still contain considerable water. An 8 lb. load of laundry can contain as much as 2 qts. of residual water. So it can take up to one hour to dry it in a tumble dryer and much longer on a clothes line. However, spinning the same load at 3300 rpm for about 3 to 5 minutes in a SPIN-X Spindryer, will reduce the residual water by as much as 60%, depending on the fiber content.

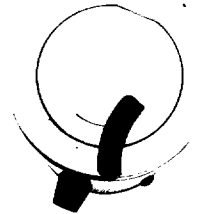

This removal of excessive residual water left by the washing machine, can reduce the tumble drying time by 1/2, and with a comparable savings for clothes line drying time. This will remove excessive mineral deposits and make your clothing softer, SAVES Energy and wear & tear on the tumble dryer, and saves you valuable time and money. These advantages really pay off, and much more so with hand washed items for quick drying. **SPIN-X spindryers, an improvement for every home.**

# SPIN X

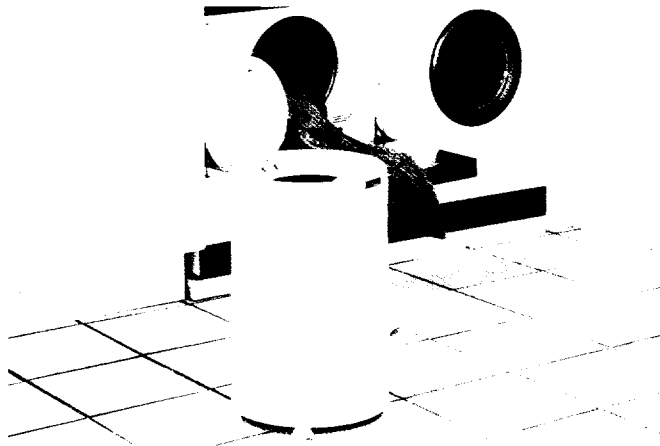

## Spindryers – exemplary drying economy.

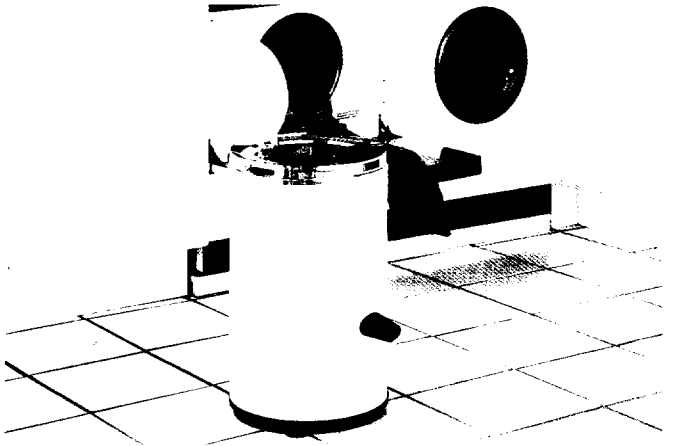

The SPIN-X 772 SEK A – Modern all white design. This model takes a 6.6 lb. load. Lid and top rim of extra durable plastic. With a Stainless Steel drum and a Super spin speed of 3,300 rpm for fast and economical water removal.

And the patented one-hand safety-catch ensures safe, no-problem handling with one hand only.

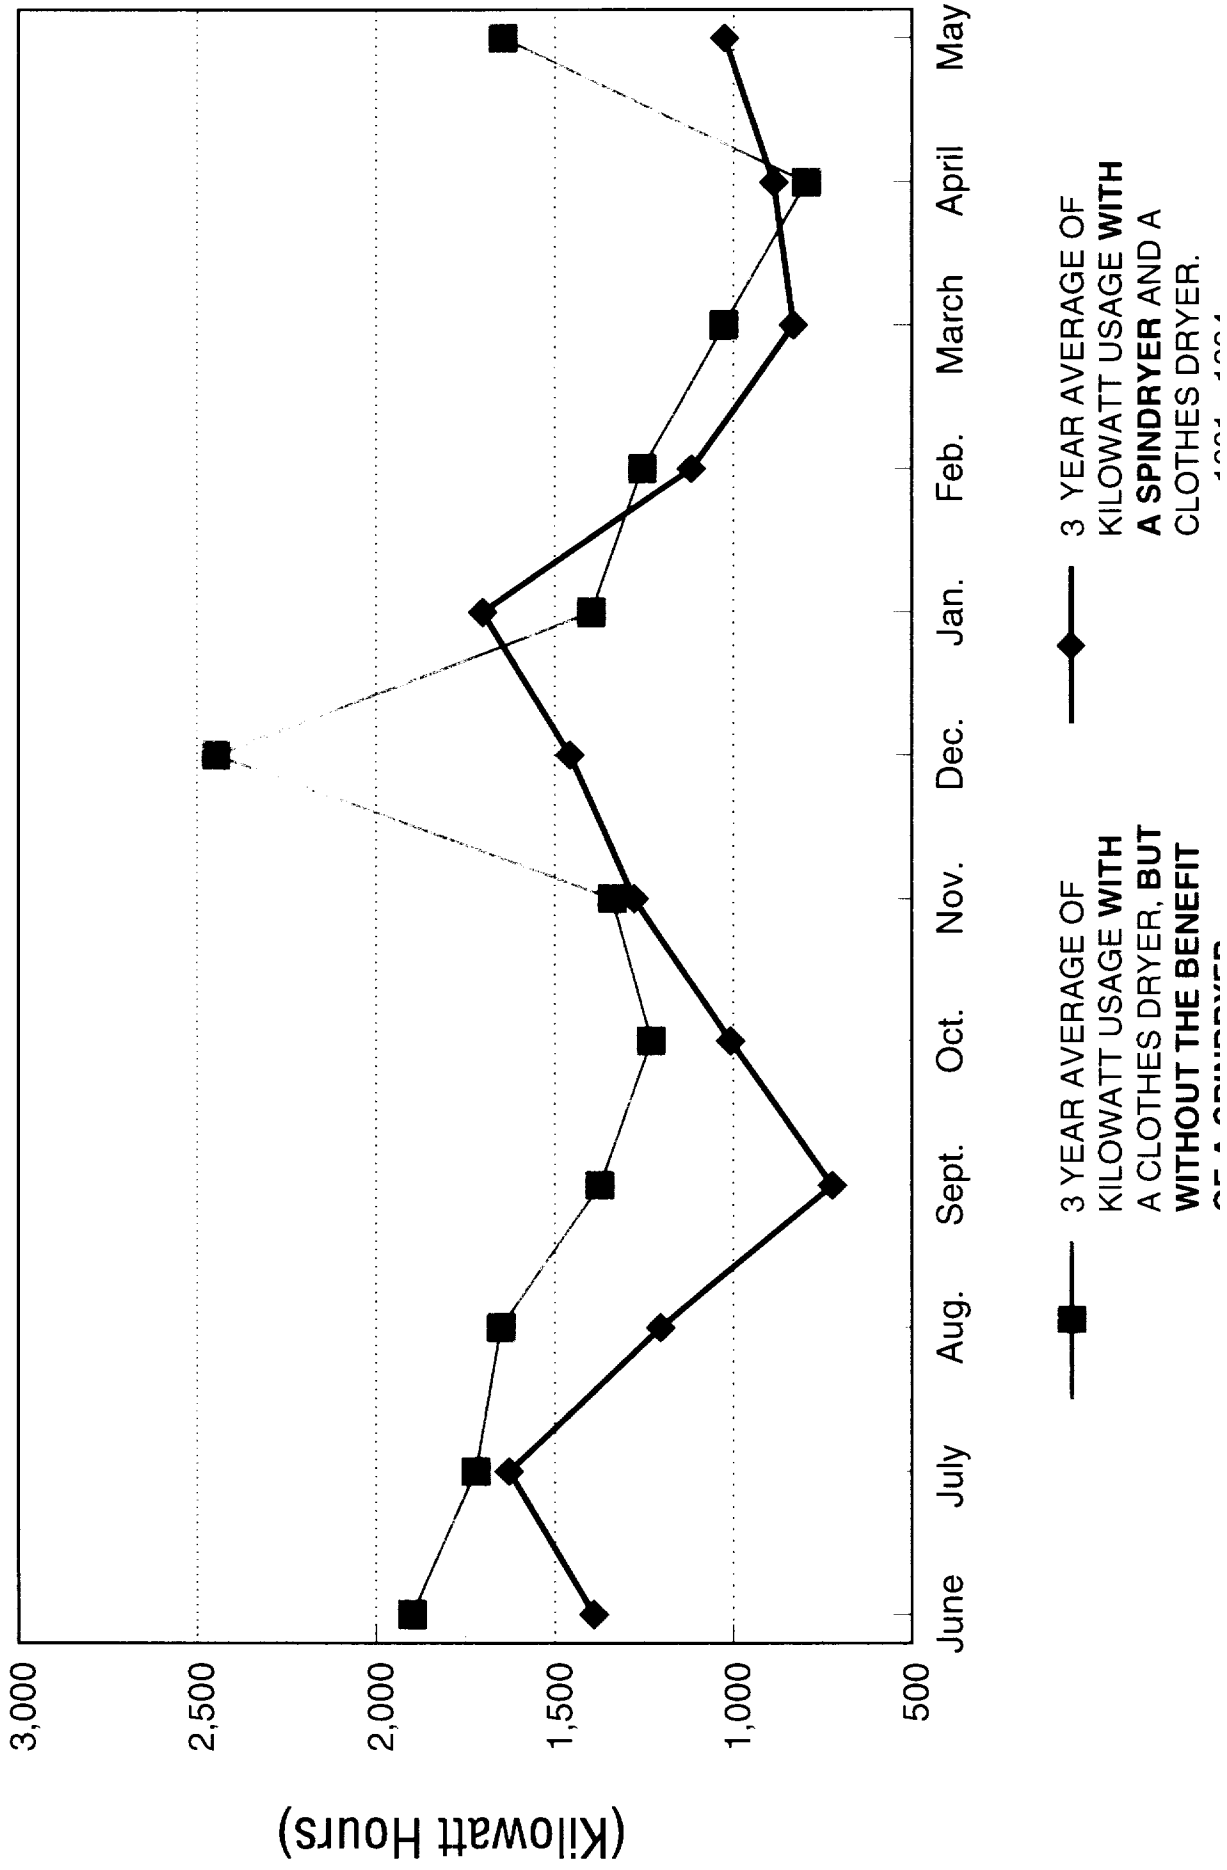

The SPIN-X 775 SEK B – Modern all white design. This larger capacity model takes a 8 lb. load. Lid and top rim of extra durable plastic. Stainless Steel drum and a Super spin speed of 3,300 rpm for your assurance of fast and economical removal of excess water.

The SPIN-X 775 SEK C – Modern white design with a chrome plated top rim and extra durable plastic lid. This deluxe large model takes a 8 lb. load. A Stainless Steel drum and a Super spin speed of 3,300 rpm for fast and economic removal of excess residual water.

# REMARKABLE ENERGY CONSERVATION

An investment of \$299.95 in a Spin-X Spindryer, saved a condominium owner \$1,104.96 in 3 years. (Figures verified by Robert E. Taylor, CPA)

**Re: Spin-X Spindryers**

We currently operate eight salons in the Houston area and have used Spin-X Spindryers for the past 2-1/2 years. We feel the savings afforded by the Spin-X machines are well worth the investment.

We have noticed that our towels do not wear out as quickly since they are in our dryers for a much shorter period of time. There is definitely much less lint in our filters after a load of towels is dried.

Spin-X Spindryers also offer a considerable savings in electric cost because the drying time is cut in half. The busier the salon the more the savings.

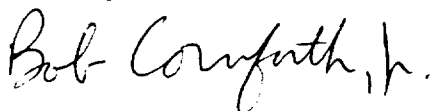

When we "get behind" on towels it is also much easier to catch-up because the dryer output can keep up with the washer. It's like having two dryers. This is very important on a busy Saturday when we run out of towels and a load that has been sitting in the washer needs to be dried A.S.A.P.

A side benefit of the Spin-X units is that we generate less heat from our dryers because of the reduced drying time; therefore, saving on air conditioning costs.

We are looking forward to a long service life from our Spin-X Spindryers. They are virtually maintenance free.

The only problem we have had is getting our employees to use the machine for each and every load coming out of the washer. A pass through the Spin-X must become standard procedure prior to towels going into the dryer.

Sincerely,

**Robert M. Cornforth, Jr.**
