

Rubber Cobblestone Pavers

Photo of Rubber Cobblestone Pavers installed at Horse Barn for safety.

Rubber Cobblestone Pavers and **Rainbow Turf Flooring Systems** are versatile material commonly used in commercial, residential, landscaping, sports and fitness domains. It is a popular product and rightly so, its benefits speak for themselves.

Rubber Cobblestone Pavers are made from recycled tire rubber. They are attractive, non-slip, maintenance free and very durable flooring. They are available in a variety of sizes, so there is bound to be a dimension to suit your application requirements.

Rubber Cobblestone Pavers have an excellent reputation for being able to withstand the effects of high traffic areas and constant abuse. They can be permanently adhered to your surface. Use the interlacing of Rubber Cobblestone Pavers' design to lock the pavers into the area that the Cobblestone Pavers are meant for. The Rubber Cobblestone pavers are available in a variety of colors, such as; terra cotta, brown or gray.

Applications

Suitable for horse barns, wash aisles, tracks and paths, due to the non-slip features. Perfect for flooring in gymnasium rooms, playgrounds, walkways and driveways. Rubber Cobblestone Pavers are great for around the backyard, on patios, verandahs and balcony floors.

The anti-slip feature makes Rubber Cobblestone Pavers ideal for use in, surrounding swimming pools, as well as nursing homes and childcare facilities.

Installation

Rubber Cobblestone Pavers are an easy to install product. Simply measure the size of your site, and then order the amount of paver's required. They can be cut to size with ease by using a utility knife. Then lay the Rubber Cobblestone Pavers in your chosen design!

A good level sub-base is crucial for best results when installing Rubber Cobblestone Pavers. Once you have excavated your site, you can also add a layer off crushed stone aggregate as your base material to level the area and achieve the proper elevation. This will also ensure that your base is permeable. It will allow moisture to escape through the joints and evaporate into the base material. You can also install the product easily over concrete and asphalt with a mastic adhesive (outdoor use liquid nail or equivalent) available at your local hardware store.

Rubber Cobblestone Pavers, once installed will require little maintenance. It is advised that you regularly clean them with a high pressure water hose; this will remove dirt and debris caught between seams.
