1" Insulated Laminated Impact Glass

Laminated glazing for the greatest protection from life's storms. Impact and hurricane glazing gives you and your home the best level of security and assurance.

During windstorms and hurricanes, wind-borne debris can break windows, allowing wind and rain to enter the house causing interior damage and roof lift. If laminated glass is impacted, broken glass fragments adhere to the interlayer and maintain the home's defense from the wind, rain and forced entry. Laminated impact glass adds security and cannot be cut from one side only, which renders glasscutters useless.

Other Options

LoE²-240 Glass, Glare Back At The Sun

The solution to solar glare and thermal discomfort start's with LoE²-240. Uncontrolled sunlight can be an offender by bringing thermal discomfort and creating visual glare. LoE²-240 glass provides a great combination of aesthetic appeal along with energy savings and indoor comfort.

LoE²-272 Glass, The Clearest Choice For Total Comfort

Low-E Windows Provide all year comfort and protection at 20 below or 110 in the shade. LoE²-272 blocks enough solar heat that cooling loads can be cut by 25% or more compared to ordinary low-E and clear glass. This high solar heat gain can contribute to more than 50% of air-conditioning costs.

LoE³-366® glass

might make all other low-E glasses obsolete. LoE³-366 delivers the ideal balance of solar control and high visibility. And it provides the highest levels of year-round comfort and energy savings, making it the perfect glass no matter where you live.

Grilles Between Glass (GBG)

We install a flat white 3/4" grille between the two layers of glass inside the air space. GBG are available in 10, 12, 15 and 18 lite classic colonial patterns. Grilles between glass to reproduce the look and feel of divided lights while keeping the energy efficiency of full size glazing panels.
