

Impact Series Doors

Overall Features

Hardware Options

Patented Hydroschild Technology™

Advanced Hydroschild Technology protects every Hurricane Impact Door system from water infiltration on all sides, which prevents warping, delamination, rotting and the development of mold and mildew.

High Performance Composite Jambs

Each Impact Series Door System contains composite jambs that provide incredibly high impact and water protection, which prevents warping, splinting or rotting.

High-Impact Fiberglass Door Skins

Each Impact Series Door System includes compression molded, fiberglass door skins, which resist corrosion, rotting, splitting or cracking.

Waterproof Composite Stiles And Rails

Impact Series Doors use a patented composite edge design structure, which prevents water from seeping into the door, thus preventing delamination or warping.

Co-extruded glass stopper provides easy glass replacement.
